2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 3536/5183.
3. (S/NF/SK) COMMENTS: Good session. Ideograms improving. 032 has overcome his previous problem of cutting the ideograms off short. 032's attention to structure is very good, he only needed prompting in describing changes, the rest of the I/A/B sequence was immaculate. His understanding and use of breaks, particularly confusion break is excellent. 032 had a physical inclemency of tiredness.
4. (S/NF/SK) EVALUATION: 3.

*WINTERY INVASION: Advancing clouds threaten to drop a fresh mantle of snow on Smoky forests already dusted with white. This aerial view looks southwest from Mount Le Conte, left foreground, in Tennessee to a shining finger of distant Fontana Lake in North Carolina and beyond to the Cheoah Mountains.*
